This month's 2008/09 forecast showed increased production and lower consumption, resulting in decreased trade and higher ending stocks. Increases in production were seen in most major producers, including China, India and Brazil. The only exception was U.S. production, which was reduced slightly due to the effects of last month's hurricanes in the delta region.

With the worldwide economic turmoil damping demand, consumption forecasts were lowered for nearly all major consumers. Total world use was lowered by over 1 percent and is now expected to be slightly below the previous season's estimate.

With increased production and lower demand, world trade was reduced by over 6 percent. China is now forecast to import 11 million bales, down 1 million from last month. Turkey is projected to lower imports by 200,000 bales as their consumption decreases. U.S. exports in 2008/09 are projected to decline to 13 million bales, 1.5 million below last month. Exports were also lowered for India, Kazakhstan, and Uzbekistan.

With the weakened demand and increased production, 2008/09 world ending stocks increased 6 percent, with over 1/3 of this in the United States. As a result, the forecast for the average U.S. farm price was reduced by 6.5 cents to 56.5 cents/ pound.
