

Export Outlook for Oilseeds & Products

Revised FY 2009 Forecast:  \$4.7 Billion to \$18.4 Billion

Revised 2009 Forecast

Key Developments

- Revised export value for entire category due mostly to lower oilseed & product unit values
- Strong early-season soybean sales to China raises export volume slightly to 27.8 mmt, but remains 3.1 mmt below last year because domestic supply is reduced
- Reduced domestic crush limits soymeal and oil exports

Wild Cards

- South American soybean production
- China's soybean demand
